WEB-DEVELOPMENT EXPERIENCE

Projects

My Bucket List: (<https://squadrilateral.github.io/bucketlist-front-end/>)

- With three other developers, built a full-stack application using JavaScript, jQuery, HTML, and CSS on the front end, and connecting to a deployed heroku server built using Express, and implementing a MongoDB database. Back-end also connects to Yelp's third-party API.
- App allows users to create a bucket list of activities by entering them manually, or accessing them by searching Yelp's 3rd-party API.

Ironside All-Time Team: (https://dannyclark77.github.io/ironside_top_seven/)

- Built a full-stack application using JavaScript, jQuery, HTML, and CSS on the front end, and connecting to a deployed heroku server built using Ruby on Rails, and a PostgreSQL database.
- App allows users to search through past rosters of a national-champion ultimate frisbee team to compile an all-time team, and then display their selections to other users.

Tic-Tac-Toe: (<https://dannyclark77.github.io/tic-tac-toe-game/index.html>)

- Built front-end application using JavaScript, jQuery, HTML, and CSS. App connects to a provided back-end through AJAX calls. App allows users to play tic-tac-toe.
