

DANIEL CLARK

Full-Stack Web Developer

617-999-5630 | dannyclark77@gmail.com | github.com/dannyclark77 | dannyclark77.github.io

SKILLS

- JavaScript
- Ember.js
- Angular2
- JQuery
- Ruby on Rails
- CSS3
- Git
- HTML5
- Express
- PostgreSQL
- Bootstrap
- MongoDB

WEB-DEVELOPMENT EXPERIENCE

Projects

ACWell: (<https://dannyclark77.github.io/acl-client/>)

- Built a full-stack application using Ember.js on the front end, and connecting to a deployed heroku server built using Ruby on Rails, and implementing a sql database.
- App allows users to track their recovery from ACL surgery, with weekly goals and suggested exercises to guide them in their recovery.

My Bucket List: (<https://dannyclark77.github.io/bucketlist-front-end/>)

- With three other developers, built a full-stack application using JavaScript, jQuery, HTML, and CSS on the front end, and connecting to a server built using Express, and implementing a MongoDB database. Back-end also connects to Yelp's third-party API.
- App allows users to create a bucket list of activities by entering them manually, or accessing them by searching Yelp's 3rd-party API.

Ironside All-Time Team: (https://dannyclark77.github.io/ironside_top_seven/)

- Built a full-stack application using JavaScript, jQuery, HTML, and CSS on the front end, and connecting to a deployed heroku server built using Ruby on Rails, and a PostgreSQL database.
- App allows users to search through past rosters of a national-champion ultimate frisbee team to compile an all-time team, and then display their selections to other users.

DataScience30

November 2017 – Present

Front-End Web Developer

Boston, MA

- Short-term contract position working with development team on Angular2 application in early stages. Responsibilities included addressing bugs in components, enhancing user interface, and developing new elements of application

General Assembly

August 2017 – November 2017

Web Development Immersive

Boston, MA

- 12-week, 600-hour, full-stack immersive web-development program

NON-DEVELOPMENT EXPERIENCE

Prior to the web-development field, I spent approximately 12 years in urban education as a teacher, administrator, and education researcher. My experience included several years as Dean of Students at both the middle and high school levels, and time working for a Harvard Economist conducting research.

EDUCATION
